

GENERAL MANAGER

General Manager Guide

How the region's data rolls up to you in SRM Tools.

What you maintain

Six things you maintain at the regional level. The dashboards and reports below depend on Plant Managers and District Managers feeding clean data upstream — your job is to verify and approve.

- 01

Submit the General Manager Report
Reports → My Reports → General Manager Report.
- 02

Read the AI Regional Analysis
Reports → My Reports → General Manager Report (top card).
- 03

Approve reports across the region
Reports → Review.
- 04

Watch the regional Dashboard
Dashboard.
- 05

Track regional Statistics
Operations → Statistics.
- 06

Stay close to operator capacity
People → Operators.

Cadence

Daily	Skim the Dashboard. Read the AI Regional Analysis as new data lands.
Weekly	Submit the General Manager Report. Approve every report in the review queue.
Ongoing	Statistics rollups, operator capacity, missing-report follow-up.

01

Submit the General Manager Report

Per-plant metrics every week: operators, runnable / down trucks, operators starting / leaving, new operators in training, total yardage, total hours. Eight metrics times every plant in the region.

Where: Reports → My Reports → General Manager Report.

1. Open Reports. The GM report card sits in My Reports.
2. Fill the per-plant grid. Numbers pre-populate from the Plant Manager Report rollups where possible.
3. Cross-check Operators Starting / Leaving against People → Operators before submitting.
4. Read the AI Regional Analysis at the top before you submit — it surfaces anomalies you may want to address.
5. Submit.

General Manager Report				
Per-plant metrics for the week				
METRIC	407	408	410	453
# of Operators	18	14	12	9
Runnable Trucks	16	12	11	8
Down Trucks	2	2	1	1
Operators Starting	1	0	2	0
Operators Leaving	0	0	0	1
New Operators Training 2		1	0	1
Total Yardage	1,840	1,320	1,090	740
Total Hours	412	298	256	188

02

Read the AI Regional Analysis

Above the GM form, an AI summary cross-references this week's submissions across all districts. It flags yardage swings, missing reports, and operator anomalies. Read it before submitting and again before your weekly executive meeting.

Where: Reports → My Reports → General Manager Report (top card).

1. Open the GM report. The AI card sits at the top before the per-plant grid.
2. Read the four-to-six-line summary. The model has access to last week's GM data + this week's plant submissions.
3. If the analysis surfaces something wrong, hit Regenerate after fixing the underlying data.
4. Cite the analysis in your weekly executive update.

AI

Regional Analysis

Across 4 plants in the week of May 16–22

Total yardage 4,990 yd³ (+3.2% vs prior week). Operator hours flat at 1,154.
410 Pearland down 8% on loads-per-hour — Mike noted a chronic late start on Wed.
407 Conroe ran a clean week despite 2 trucks in shop; Mike's overdue PM report is the only red flag. 408 leaving 0 / starting 0 — verify with district HR before Friday.

Regenerate

03 Approve reports across the region

Every weekly report — Plant Manager, Plant Efficiency, District Manager, Safety, Aggregate Production, Ready Mix Instructor, Quality Control — flows into your review queue once the District Manager has signed off.

Where: Reports → Review.

1. Open Reports → Review. Filter by report type if the queue is long.
2. Approve clean submissions. Reject with a specific reason — the DM and PM both see your comment.
3. Anything still unsubmitted by the cutoff shows on the Missing tab.
4. Use the Lost Loads tab to skim every lost load this week — patterns matter.

Review Queue

Weekly Plant Efficiency Report 408 Houston · submitted by Pat Miller	Approved	Open

04 Watch the regional Dashboard

The Dashboard auto-scopes to your region: fleet allocation, operator status across every plant, unverified mixers, overdue services. Two minutes a day catches problems before they escalate.

Where: Dashboard.

1. Open Dashboard from the nav root.
2. Region Overview shows fleet-wide KPIs.
3. Alerts panel lists unverified mixers, overdue services, open issues, long-term shop assets.
4. Use the embedded view to drill from any alert into the asset detail without leaving the dashboard.

05 Track regional Statistics

Operations → Statistics surfaces every cross-plant metric the region produces — service quality, customer satisfaction trends, help-and-cross-loading scores, kicker patterns. The data feeds the GM AI analysis, so reviewing it weekly closes the loop.

Where: Operations → Statistics.

1. Open Operations → Statistics.
2. Production: per-plant yardage trends and day-of-week shape.
3. Customer Satisfaction: which plants are slipping vs. winning.
4. Help & Cross-Loading: how much each plant gave or received from others.
5. Service: late starts, slow pours, where service is winning or slipping.

Operations · Planner

Today · 22 May 2026 · 4 plants in scope

407 Conroe		3 orders	
06:00	ACME Construction	40 yd ³	4 TRUCKS
07:30	Riverside Plaza	24 yd ³	3 TRUCKS
09:15	Northwood Apartments	80 yd ³	8 TRUCKS
408 Houston		2 orders	
06:30	Bayou Bridges Project	120 yd ³	12 TRUCKS
10:45	Eastside Office Tower	36 yd ³	4 TRUCKS

06 Stay close to operator capacity

Operator hires, terminations, light-duty moves, training pipeline — the region's entire labor picture. Trends here predict next quarter's yardage capacity.

Where: People → Operators.

1. Open Operators from People.
2. Filter by status to see the Training pipeline, Light Duty count, and Pending Start hires.
3. Cross-check against your GM Report's "Operators Starting / Leaving" columns weekly.
4. Flag plants where the training pipeline doesn't match the District Manager's growth plan.

Quick reference

Where things live in the navigation.

REPORTING	Reports	GM report + review queue for the region
DASHBOARD	Dashboard	Regional fleet, operator, and alert overview
TOOLS	Operations	Statistics rollups for the region
PEOPLE	Operators	Regional operator capacity
PEOPLE	Managers	Manager roster across plants and districts

If the app doesn't match this guide

The AI Regional Analysis has stale numbers → click Regenerate after the underlying reports have been submitted.

A District Manager's submissions are slow to land → use the missing-reports filter and call the DM directly.

A plant's yardage doesn't match the GM rollup → the Plant Efficiency Report is the source of truth; reconcile there first.
