

Plant Manager Guide

How to keep SRM Tools accurate at your plant.

What you maintain

Seven things keep your plant's data in SRM Tools accurate. None take long individually — they only work on the cadence below.

- 01

Complete the weekly reports
Reports → My Reports.
- 02

Verify mixers, tractors, and heavy equipment
Assets → Mixers (and Tractors, Heavy Equipment).
- 03

Scan monthly maintenance forms
Maintenance → your plant → the active form.
- 04

File a same-day lost load report
Reports → Lost Loads → New Lost Load Report.
- 05

Keep the task list current
List, from the Reporting menu.
- 06

Keep the operator roster honest
People → Operators.
- 07

Log NRMCA scale calibrations
Calibrations & Certifications → your plant.

Cadence

Same day	Lost Load Reports (when one happens). Update the task list. Asset corrections when something changes.
Weekly	Plant Manager Report + Weekly Plant Efficiency Report, by the district cutoff.
Monthly	Upload the scanned maintenance form when the tech delivers it.
As needed	Operator roster changes. Scale calibrations.

01

Complete the weekly reports

Two reports land in your queue every Monday morning: the Plant Manager Report (one number) and the Weekly Plant Efficiency Report (one row per operator).

Where: Reports → My Reports.

1. Open Reports from the Reporting menu. My Reports is the default tab.
2. Plant Manager Report: enter Total Hours for the week, submit.
3. Weekly Plant Efficiency Report: add a row per operator who ran. Each row needs Start, 1st Load, EOD In Yard, Punch Out, and Loads. Hours and L/H compute themselves.
4. Submit both before your district's cutoff. Overdue cards turn red on the District Manager's queue.

The screenshot shows a web application interface with a light gray header and a main content area. At the top left of the main area are three colored circles (red, yellow, green). Below them are two report cards. The first card is for the 'Plant Manager Report' (PM), labeled 'Overdue' in a red pill. It shows '407 Conroe · due Mon 7:00 AM CST' and a red 'Submit now' button. The second card is for the 'Weekly Plant Efficiency Report' (PE), labeled 'In progress' in a yellow pill. It also shows '407 Conroe · due Mon 7:00 AM CST' and a dark blue 'Continue' button.

Report Type	Status	Due Date	Action
Plant Manager Report (PM)	Overdue	407 Conroe · due Mon 7:00 AM CST	Submit now
Weekly Plant Efficiency Report (PE)	In progress	407 Conroe · due Mon 7:00 AM CST	Continue

02

Verify mixers, tractors, and heavy equipment

Each Mixer, Tractor, and Heavy Equipment row has a Verify button. Opening it walks you through a checklist of fields that must be current.

Where: Assets → Mixers (and Tractors, Heavy Equipment).

1. Open Mixers from the Assets menu. Click Verify on any row.
2. Work through the three modal sections: Checklist (VIN, Make, Model, Year, Hours, Last Service, Last Chip), Operator (phone, rating), Open Issues.
3. Fix anything flagged. The progress bar shows when every requirement is met.
4. Click Save & Verify. The verify timestamp updates, the DM dashboard sees you're current.
5. Repeat on Tractors and Heavy Equipment.

Verify Mixer ×

Review the items below before confirming verification.

Ready to verify 100%

● **Checklist** 7 of 7 fields complete ›

● **Operator** Carlos Rodriguez · phone, rating set ›

● **Open issues** None ›

Cancel **Save & Verify**

03

Scan monthly maintenance forms

When the maintenance tech hands you a completed paper form, scan it and upload the PDF the same day.

Where: Maintenance → your plant → the active form.

1. Open Maintenance from the Reporting menu. Pick your plant in the left rail.
2. Open the form that's due. Step 2 is the upload card.
3. Drag the PDF into the dashed drop zone, or click to browse.
4. Add any notes in Step 3 — issues found, parts ordered, follow-ups.
5. Click Submit for review.

Step 2

Upload completed scan

Drop a single PDF below or click to browse. Convert images first if needed.

Click to browse or drag a PDF here
PDF only · single file

Step 3 · Notes & submit

Submit for review

04

File a same-day lost load report

Any time a load is lost, spilled, refused, or doesn't make it onto the job, file the report the same business day.

Where: Reports → Lost Loads → New Lost Load Report.

1. Open Reports and switch to the Lost Loads tab.
2. Click New Lost Load Report.
3. Fill date, plant, yardage, truck, customer, and ticket number.
4. Pick a reason: Plant Manager Error, Operator Error, Plant Issue, Truck Issues, or Other.
5. Write the explanation. Mark the reprimanded checks if applicable. Attach photos if you have them.
6. Submit.

Plant Manager Error

Operator Error

Plant Issue

Truck Issues

Other

☐ Operator reprimanded

☐ Plant manager reprimanded

05 Keep the task list current

List view is your running task log. Add things as they come up; mark them done when they're done. The District Manager pulls this list for one-on-ones.

Where: List, from the Reporting menu.

1. Open List from the Reporting menu.
2. Click Add Task (or hit Cmd+N). Fill description, priority, deadline, responsible role, plant.
3. Open a task to update its status (Pending / In Progress / Completed) or priority.
4. Cmd+K focuses search. Use it.

HIGH PRIORITY · 1						
☒	In Progress	HIGH	Reorder admix · silo 2	· supplier confirmed before EOM	May 23	Maintenance
MEDIUM · 1						
☐	Pending	MED	Call supplier re: late delivery	407 Conroe	May 24	Plant Manager
LOW · 1						
☐	Pending	LOW	Replace dust collector filter	407 Conroe	Jun 02	Maintenance

06

Keep the operator roster honest

Every operator at your plant should be in Tools with the right status. New hires and status changes happen the same day.

Where: People → Operators.

1. Open Operators from the People menu.
2. Click + Add Operator for a new hire.
3. For existing operators, change status inline: Active, Light Duty, Pending Start, Training, Terminated, No Hire.
4. Use the Comments button to log conversations. Use History for timeline events (transfers, write-ups).
5. If Statistics → Operators surfaces an Unmatched name that's yours, fix the spelling so loads attribute correctly.

NAME	EMPLOYEE ID	PLANT	STATUS	ACTIONS
Carlos Rodriguez	1842	407 Conroe	Active	Comments History
James Wilson	2103	407 Conroe	Light	Comments History
Andre Banks	2308	407 Conroe	Traini	Comments History

07

Log NRMCA scale calibrations

When a scale is calibrated, log it that day. Overdue scales show red on your plant and roll up to the General Manager's dashboard.

Where: Calibrations & Certifications → your plant.

1. Open Calibrations & Certifications from the Reporting menu.
2. Red = overdue, amber = due soon, green = OK.
3. Click + Log Calibration on the relevant scale row.
4. Enter date, who calibrated it, and any notes.
5. Save. The status flips back to OK.

SCALE · 407 CONROE			
	LAST CALIBRATED	AGE	STATUS
Batch scale	12 Apr 2026	40d	+ Log calibration
Aggregate scale	18 Jan 2026	124d	+ Log calibration
Water meter	04 Sep 2025	260d	+ Log calibration

Quick reference

Where things live in the navigation.

REPORTING	Reports	Weekly reports, Lost Loads, QC reports
REPORTING	List	Task list
REPORTING	Maintenance	Monthly maintenance forms
REPORTING	Calibrations & Certifications	NRMCA scale calibrations
ASSETS	Mixers	Verify mixers
ASSETS	Tractors	Verify tractors
ASSETS	Heavy Equipment	Verify equipment
PEOPLE	Operators	Roster, status, comments, history
TOOLS	Operations	Daily plan, schedule, statistics

If the app doesn't match this guide

A button is missing or behaves differently → confirm with your District Manager. The app ships often.

An error shows up → screenshot it, log a task on List with Maintenance as the role, continue with the rest of the work.

Operator names don't match between dispatch and Tools → fix the operator record. Statistics → Operators surfaces the unmatched list with a copy-to-clipboard report.
